

Amendments to the Claims:

The listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claims 1-9. (Canceled)

Claim 10. (New) A series of components for a vehicle seat for a motor vehicle, comprising a cushion core, ventilation ducts running along and inside at least one of a seat surface and a backrest surface and having a constant cross section, and ventilation channels arranged essentially transversely to the ventilation ducts, having a constant cross section, penetrating the entire thickness of the cushion core and extending from the ventilation ducts as far as a rear wall facing away from at least one of the seat surface and backrest surface, wherein a predetermined arrangement of at least one of the ventilation ducts and the ventilation channels in the cushion core defines regions ventilated to different extents adapted to a ventilation requirement of a standard vehicle occupant.

Claim 11. (New) The series of components as claimed in claim 10, wherein the ventilation requirement is adapted to a body pressure distribution.

Claim 12. (New) The series of components as claimed in claim 10, wherein the ventilation requirement is adapted to body contact points.

Claim 13. (New) The series of components as claimed in claim 10, wherein the ventilation ducts are configured as a duct grid and intersect in a manner connected in flow terms.

Claim 14. (New) The series of components as claimed in one of claim 13, wherein the ventilation requirement is adapted to a body pressure distribution.

Claim 15. (New) The series of components as claimed in one of claim 14, wherein the ventilation requirement is also adapted to a body contact points.

Claim 16. (New) The series of components as claimed in claim 13, wherein at least one of the ventilation ducts and ventilation channels is essentially arranged regularly.

Claim 17. (New) The series of components as claimed in one of claim 13, wherein at least one of the ventilation ducts and the ventilation channels are arranged only in regions with ventilation provided.

Claim 18. (New) The series of components as claimed claim 13, wherein at least one of the ventilation ducts and the ventilation channels are closed in regions in which no ventilation is provided.

Claim 19. (New) The series of components as claimed claim 18, wherein at least one of the ventilation ducts and the ventilation channels are arranged only in regions with ventilation provided.

Claim 20. (New) The series of components as claimed in claim 13, wherein the vehicle seat is a passively ventilated vehicle seat.

Claim 21. (New) The series of components as claimed in claim 13,
wherein the vehicle seat is an actively ventilated vehicle seat, and at least one
fan or a miniature ventilator is operatively associated therewith.
